- Custom Blends

Services Offered

Repackaging

Flexible and easy to work with...Ruger is the right fit for customers who need less than standard package sizes. Ruger repackages graded raw materials as well as many laboratory reagents and solvents. Our user-friendly, just-right packaging prevents waste, frees storage space, eliminates disposal cost, protects product integrity and offers economical convenience for our customers. We also offer toll and custom repackaging. At Ruger, repackaging is not a service or an exception—it is what we do!

FDA, cGMP, cGLP, DEA, NACD ...when you partner with Ruger you're not working alone.

We follow the NACD's "responsible distribution and product stewardship" codes in every phase of chemical packaging, storage handling, transportation and disposal. We are registered with the FDA and EPA. Our license with the DEA allows us to repack and distribute Controlled Dangerous Substances, listed Class I Chemicals and essential chemicals. Our plant and laboratory are cGMP/cGLP compliant.

A risk reducing supplier for regulated markets...We keep quality control and documentation under control

Our on-site analytic and regulatory laboratory and our quality system are reassurance that when you source your ingredients from Ruger you're in control. Every ingredient we sell is meticulously qualified by our multifaceted and dedicated QC Department. You know where and when each product was made and you don't have to wonder about its quality. At Ruger, you're never working alone. *We get what you need™*
